Dear John and all,

Early this morning a being of Light came to me and woke me up and announced he had something to share with you this day and so I got up and began meditating and waited then for his return.

The following information is from him. He is a most beautiful and Radiant being of Light and his face is like fine polished marble with strong features but warm and glowing like marble.

Disciples of Truth---

My name is Bodhisattva Samatabhadra and I am here to present to you information that might help you understand these next steps each of you are taking to the fulfillment of the foundation.

I am the new Being of Light Jim spoke of some days ago, when he first became aware of my presence moving into the foundation's stream of Life Energy. Myself and the beloved Kuan Yin have worked with Jim in past lives as well as this one and it was through his desire to see the foundation succeed that I have been chosen to involve myself with your goals.

The Planetary Hierarchy which you have been involved with for these past few months have asked that an alignment with higher celestial beings be attempted with the Foundation Committee in hopes of offering each of you more protection and a stronger inner desire to accomplish the goals set down before you by the Hierarchy.

As you have met over these last few months as a group trying to unite and harmonize your energy so too the Hierarchy has worked diligently from this side to help you in accomplishing this. Now that the energy has begun to come together a spark of Light has been born from your efforts and the group effort has given birth to a Divine Spark of Purpose. This divine Spark is the seed which shall one day sprout and grow and become the Fetzer Foundation. And it is in the warmth and love in the group that this Seed Light will grow and be matured,

within the womb of the group love.

This is why myself of the other Bodhisattvas have been asked to enter into the picture at this time. It is truly rare for an event of this caliber to take place and now that it has, the events of development of each of you -- the foundation -- and the Divine Spark must receive all the help possible for the success of this mission. With the birth of the Seed Light also was formed on the Astral plane a temple of Light to house the Spark within. Just as your physical astral and mental body houses the divine spark of your being, so too, a temple, a body has been conceived and developed in the astral for this divine spark.

That is why myself and the other Bodhisattvas are now present in your flow of life, for we are here to protect, guide and give support to the development of this being which you and Hierarchy have brought forth. It was and is through the flow of love and light between you - the group- and Hierarchy that this Life Flow and Being of Light shall be nourished. The Star of Life as it is known here, which Jim drew up for you sometime ago, lays out quite well a picture of interchange, and through this interchange this great event has taken place.

I trust you can see the major importance of this event and with this in mind you will view the changes in your life somewhat differently than before. Growth and maturity are important in those of service as is flexibility, so that you accept change, growth, and maturity as it is offered to you.

I shall represent the council of Bodhisattvas and shall work with you closely, to help maintain a state of balance in this time of growth and change. If ever you find yourself in need of understanding call forth and myself or one of the Bodhisattvas will help you find meaning and understanding. We do ask though that you do not misuse this privilege for to do so means that you also lose the right.

First attempt on your own to understand and then afterward if you feel you need yet more understanding call forth and we will offer assistance. Myself - the Bodhisattva Samatabhadra and Kuan Yin are Brother, Sister Soul or one soul expressing as masculine and feminine. We are the Bodhissattva of Love and Compassion and oversee this energy as it flows into the earth's evolution. We attempt to dispense it wherever it can best serve mankind and the individual.

This is why we have been called in to oversee the birth and raising of the Divine Spark you have brought forth. The Spark and the foundation shall be an instrument for love and compassion to those who are ill and in need of health. It will be through your endeavors that new more painless and compassionate ways to health will be developed. Thus our influence is important in overseeing the growth and development of the Divine Spark of the Foundation.

In closing I bring your love and our love together in service and truth and know we shall accomplish our goals. Greetings and Love from Myself, Kuan Yin and Michael.

Love,

Bod Sum
